DETAILED ACTION

The present application has been transferred from former Examiner Young to the present Examiner.

The present action is a 2nd Supplemental Restriction requirement. The core structure between the amended genus peptide formulas is known and thus turns upon an individual search of each genus formula. The Examiner attempted an updated search of the art on both of the amended genus peptide formulas now claimed. 34 references were uncovered, as well as over 100 references total (including inventors search, term search). In reviewing the search to distinct compounds, an undue burden is posed, since art on one compound structure clearly will not read on the other distinct structure. Applicant is required to elect and amend the claims to one or the other compound structure. Under MPEP 800-804 restriction is proper at anytime during prosecution, as necessary.

Supplemental Election/Restrictions

Requirement for a Single Genus Peptide Structure Election as the Invention

The inventions are independently drawn to distinct genus structure formulas; comprising non-mirror image stereochemistry genuses. The formulas are each independent and distinct compounds, absent evidence to the contrary that art upon one renders obvious any other. There is no substantial core structure in these small dipeptides that was found to run through the myriad of peptides that would allow for a coextensive search of all compounds. Since the overlapping core was found in the art, a search would turn upon a distinct and separate search of each genus to determine novelty, (not allowing all compounds to be coextensively searched based thereon).

Art Unit: 1654

Thus, posing an undue search burden. Therefore, Applicant must elect and amend the claims to one or the other genus formula, to which the elected invention (e.g. Group I) will be examined as drawn to. **This requirement is not to be taken as an election of species, but rather as an election of a single invention, since each compound is assumed to be a patentably distinct invention, in the absence of evidence to the contrary.**
